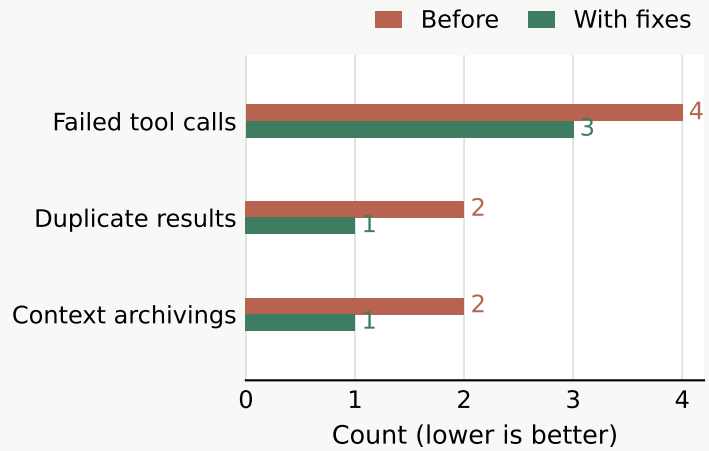
# Long-task survival: one replayed failure, identical scripted model

| | Before (c705034) | With fixes |
|---|---|---|
| Task finishes, no abort | Not handled | Handled |
| Shell in readable data | Not handled | Handled |
| Corrective guidance sent | Not handled | Handled |
| Survey survives compaction | Not handled | Handled |



One deterministic trial per version. Real engine, tools and durable store; no GPU, provider or user files.
This measures failure handling and context cost, not model quality or speed.
