

Media trials: file integrity and visual quality are separate checks

Media trial	Dimensions	Frames	Seconds	File integrity	Visual quality
Image / 5 steps / tiled	512 x 512	n/a	16.08	pass	pass
Video / 8 steps / tiled	512 x 288	9	66.20	pass	fail
Video / 20 steps / tiled	512 x 288	9	74.74	pass	fail
Video / 20 steps / standard	512 x 288	9	72.23	pass	fail
Video / 20 steps / standard	512 x 288	9	71.31	pass	fail
Video / 20 steps / standard	832 x 480	33	121.34	pass	pass

Single trials, no statistical ranking or throughput claim. CPU: 8K / 4 threads; GPU: 32K / 6 threads. Backend, concurrent load and memory timing differ.
Media timings are receipts, not a comparison of unlike generators. Failed and unreviewed output stays visible.
